Career Objective

Enthusiastic and adaptable Full-Stack Developer with a strong foundation in PHP, API integration, and ERP system development. Passionate about building scalable, efficient applications and contributing to collaborative teams. Former educator with excellent communication and problem-solving skills, now transitioning fully into software development to deliver impactful technical solutions.

Technical Skills

- **Programming Languages:** PHP, Python, C++.
- **Web Development:** HTML, CSS, JavaScript, Bootstrap, MySQL, RESTful APIs
- **Frameworks:** SLIM (Micro-framework), Basic familiarity with Laravel
- **Tools & Platforms:** Git, GitHub, VS Code, Postman, phpMyAdmin
- **Other Skills:** ERP Customization, Database Modeling, Real-time System Integration
- **Soft Skills:** Problem-solving, Team Collaboration, Technical Mentoring, Clear Communication

Professional Experience

Full-Stack Developer, *Digital Think Technology LLP, Bangalore*

Jul 2024 – Present

- Designed and developed scalable RESTful APIs using SLIM and PHP for core ERP modules.
- Integrated Meta (Facebook) Lead APIs, Google APIs, and implemented automated lead distribution logic to streamline customer acquisition and assignment processes.
- Optimized backend performance and ensured secure, reliable data handling across ERP systems.
- Collaborated with front-end and product teams to deliver stable, user-centric ERP solutions.

Lecturer (Computer Science), *KLE BCA, Nagarbhavi, Bangalore*

Sep 2023 – Mar 2024

- Delivered comprehensive lectures and practical sessions.
- Designed project-based learning modules to help students build real-world web applications.
- Mentored over 100 students, providing technical guidance, code reviews, and career preparation support.
- Conducted workshops on web development fundamentals, promoting hands-on, industry-relevant skills.

Web Developer Intern, *DeveLearn Technologies Pvt. Ltd.*

Nov 2022 – Jun 2023

- Designed and implemented secure database models for user management, blogs, and OTP authentication systems.
- Developed core back-end features, including feedback modules (comments, likes/dislikes) and user interaction tracking.
- Contributed to real-time attendance and reporting modules, improving system accuracy and reliability.

Projects

SCS Web Portal

[PHP, MySQL, HTML, CSS, Bootstrap]

- Built a full-stack web platform with distinct user and admin interfaces for content and resource management.
- Developed an admin dashboard with role-based access, enabling secure management of alumni data, gallery, news, and downloadable resources.
- Integrated user-facing features like direct faculty contact, improving accessibility and communication within the platform.
- Ensured responsive design and intuitive navigation for seamless user experience across devices.
